

Krishnendu Samanta

React Native & React.js Engineer | TypeScript · Mobile + Web · REST APIs · 0-to-1 Product Work

skrishnendu115@gmail.com | +91 8910886505 | Kolkata, India | github.com/krishnendu-2003 | linkedin.com/in/echowhisper

PROFESSIONAL SUMMARY

Product-minded engineer with 1+ year of experience building mobile and web applications from the ground up in React Native and React.js. Has taken features from zero to shipped across a React Native (Expo) mobile app and a React.js web platform on a shared REST API — building reusable, high-performance components and integrating backend APIs, authentication and third-party services. Works in TypeScript, owns features end to end from development through release, and has repeatedly built complete products under tight constraints, winning two hackathons. B.Tech in Computer Science and Engineering with an AI/ML specialization, CGPA 7.5, graduating August 2026.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, SQL, Python, C++

Frontend: React.js, React Native (Expo), Redux, React Context API, Next.js, React hooks, HTML5, CSS3, responsive design, reusable components, state management

Mobile: React Native (Expo) for Android and iOS, Android builds and APK generation via Android Studio and Expo, push notifications, app store release support

Performance & Quality: Reusable component libraries, responsive and cross-device testing, UI performance optimization, cross-browser compatibility, debugging and issue resolution

Backend: Node.js, Express.js, REST API design, RESTful web services, JSON, WebSocket, Java, Spring Boot, Spring Data JPA, Hibernate

Databases: MongoDB, MySQL, PostgreSQL — schema design and data modelling

AI Integration: Gemini API integration into a production browser tool, computer-vision model serving, B.Tech specialization in Artificial Intelligence and Machine Learning

Tools: Git and GitHub, npm, Postman, Android Studio, Firebase (Authentication, Cloud Messaging), Vercel, Chrome DevTools

Practices: Component architecture, API integration, code review, responsive and cross-device testing, UI performance optimization, Agile collaboration, problem solving, communication

PROFESSIONAL EXPERIENCE

Software Developer Intern

Jun 2025 – Present

Tech Vortex Ventures Private Limited, Kolkata

- Own features end to end across a React Native (Expo) mobile application and a React.js web platform served by a shared REST API layer, keeping one contract consistent across two clients.
- Manage application state with Redux and the React Context API, and build reusable UI components that follow the existing application design patterns.
- Built a real-time chat interface over WebSocket connections with push notifications — optimistic message rendering, reconnection handling, and foreground/background message states.
- Implemented authentication and session handling with Firebase Authentication, and push notifications through Firebase Cloud Messaging from server-side trigger to device delivery.
- Fix bugs and improve application stability, performance and usability across both clients, working from user-reported issues through to release.

Software Developer Intern

Mar 2025 – Jun 2025

Catoff Gaming, Remote

- Integrated three third-party game platform APIs (Fortnite, Marvel Rivals, CS:GO) into the React.js and TypeScript client, with JSON data normalization and user-facing error, loading and empty states.
- Streamlined project workflow and delivery process, improving team efficiency by approximately 25%.

PROJECTS

SwitchSocial

React.js, React Native, Redux, Node.js, Express.js, MongoDB

Creator monetization platform with both a React.js web client and a React Native mobile client on a shared Express.js REST API. Built the component library and screen flows for both clients, sharing Redux state patterns across web and mobile.

FirmDev

React.js, Node.js, Express.js, Python, Gemini API

Browser-based development tool and browser extension for IoT projects, removing the need for multiple desktop software installs. Built the React.js interface that generates Arduino code snippets through the Gemini API and pushes them directly to the connected board.

Deepfake Detection System

React.js, Python, Deep-learning CV models

Built the React.js web interface for a computer-vision classifier detecting manipulated video and imagery. Winner, Binary 2025 (Kalyani Govt. College).

ACHIEVEMENTS

- Hackathon Winner, Binary 2025 — Kalyani Govt. College (Deepfake Detection System)
- Hackathon Winner, Prayash 2024 — Techno India Batanagar (Hardware Project)
- Contributor, Superteam India — Web3 developer ecosystem

EDUCATION

B.Tech, Computer Science and Engineering

Sep 2022 – Aug 2026

Sister Nivedita University (MAKAUT), Kolkata

Specialization: Artificial Intelligence and Machine Learning. CGPA: 7.5

Higher Secondary, Science

2022

Julien Day School, Kolkata

ADDITIONAL INFORMATION

Languages Spoken: English, Bengali, Hindi

Certifications: Rinex Start-A-Thon; Campus Ambassador

Volunteering: Institution's Innovation Council (IIC) Regional Meet; Google Developer Student Clubs (GDSC); Udyog Entrepreneurship Program
